Chapter 1: Computational Resources

This section lists computational resources on the Internet: centers or particular machines that serve users with special computing requirements. A good example of such a resource is a supercomputer center.

Contents

Air Force Supercomputer Center at Kirtland AFB 1.1
Cornell Theory Center, Cornell National
Supercomputer Facility 1.2
John von Neumann National Supercomputer Center 1.3
National Center for Atmospheric Research 1.4
National Center for Supercomputing Applications 1.5
National Energy Research Supercomputer Center 1.6
Northeast Parallel Architectures Center 1.7
Ohio Supercomputer Center 1.8
Pittsburgh Supercomputing Center 1.9
San Diego Supercomputer Center 1.10
US Army Ballistic Research Laboratory 1.11
University of California at Berkeley 1.12
SuperComputing Services, The University of Calgary 1.13
Center for Experimental Research in Parallel Algorithms,
Software and Systems (CERPASS) 1.14
University of Texas System Center for High Performance Computing 1.15
North Carolina Supercomputing Center 1.16
Arizona State University Supercomputing Center 1.17
UCLA Office of Academic Computing 1.18
